

# Cohesion™

## Optimize Soil-Applied Herbicide Performance

**Cohesion™** utilizes proprietary technology and is designed for customers who want to optimize residual activity from their pre-plant/preemergent chemistry. **Cohesion** helps to increase spray deposits, resulting in more uniform and better coverage. Once on the soil, the **Cohesion** results in adhesion of the preemergent to the soil, keeping it concentrated in the surface where it provides for longer weed control than the herbicide alone.

### Seeing is Believing

Less weeds are present in the trial block with **Cohesion** added in the Matrix + Prowl tank mix.

**In-Season Applications:  
Drift Reduction:**

**4 FL OZ/A**

**Post-Season Applications:**

**8-16 FL OZ/A**

*When mixing products, it's generally recommended to add Cohesion last.*

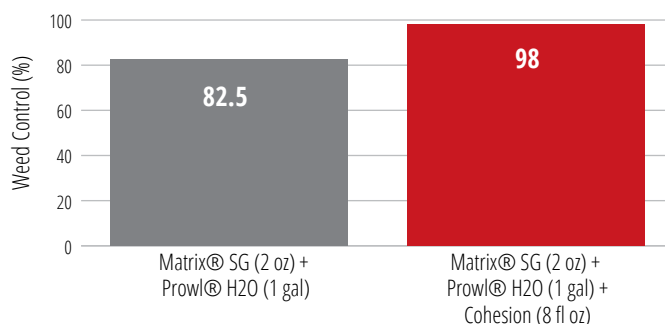

### FEATURES AND BENEFITS

- ✓ Greater herbicide soil retention leading to improved residual weed control
- ✓ Increased soil deposition creating better coverage
- ✓ Excellent soil absorption and adhesion properties
- ✓ Excellent tank mix compatibility

### Improve Weed Control With Cohesion

#### Fall Herbicide on Honeycrisp Apples

148 DAT

Manson, WA
